Virena® Setup Instructions

CUSTOMER SERVICE
If Sofia 2 does not perform as expected, contact Quidel Technical Support 800.874.1517 (in the U.S.), 858.552.1100 (outside the U.S.), technicalsupport@quidel.com or your local distributor.
CONFIGURING VIRENA

1. Before configuring Virena, log in to the Supervisor Menu, select Settings, then Other Settings.

2. On the first screen, enter the 5-digit ZIP Code that was entered for the facility in MyVirena, select ✔️ to confirm the entry and close the keyboard, then select ➔ to advance to the next screen. Continue to set remaining settings as needed and return to the Run Test screen.
3. Returning to the Supervisor Menu, select **Network Settings**, then **Virena Settings**.

4. On the first screen, confirm that **Virena Domain Name** is pre-populated as *my.devicecloud.com*. If not, re-enter the information as shown below. Select ➔ to advance to the next screen.

5. Set **Auto Send** and **Queue Results** to **On**. Select ➔ to advance to the next screen.
6. Confirm that **Transmit Patient ID** and **Transmit Order Number** are set to **Off**. Select ☝️ to advance to the next screen.

![Screenshot of settings menu with Transmit Patient ID and Transmit Order Number options set to Off](image1)

7. Set **Age Required** to **Yes**. Select ✔️ to return to the Run Test Screen.

**TESTING THE VIRENA CONNECTION**

8. From the **Supervisor Menu**, select **Export, Import, Delete**.

9. In the top scroll bar, select left until Test Connection appears. Select right to begin testing the connection.

10. If the connection is successful, the message Test connection success. Signal strength -##dBm. will appear. Sofia 2 is now connected to the Virena cloud. If the connection is unsuccessful, contact Technical Support.

11. Run Calibration, Patient Test, or QC to send a result to the Virena cloud and confirm the connection.
