As required per 21 CFR 866.3328(b) for all rapid influenza diagnostic tests, Quidel Corporation performed annual reactivity testing with the contemporary influenza strains identified by FDA in consultation with the Centers for Disease Control and Prevention (CDC). QuickVue Influenza A+B detected all of the influenza viruses in the CDC panel:

* WHO recommended vaccine strains for use in the 2019 – 2020 influenza season (northern hemisphere winter)
All strains were obtained from the CDC and tested per the swab protocol recommended by the CDC. Test results generated for each influenza strain are listed below:
