QuickVue Influenza Test and QuickVue RSV Test:
Test for Both Influenza and RSV Using One Patient Sample

One patient sample is sufficient to perform both the QuickVue Influenza and QuickVue RSV tests.

Liquid Nasal Specimens
Following your Institution’s protocol for obtaining liquid nasal specimens, use a specimen container to collect 650-1000 μL of patient sample. Then follow the sample preparation procedure shown below in Figure 1 and the test procedures in the QuickVue Influenza and QuickVue RSV Package Inserts.

Figure 1: Sample Preparation for Wash and Aspirate Specimens
If necessary, please contact Quidel Technical Support for specimen tubes or saline vials.

Please contact Quidel Technical Support at 800.874.1517 (in the U.S.), 858.552.1100 (outside the U.S.) or technicalsupport@quidel.com if you have any questions regarding the QuickVue Influenza Test QuickVue RSV Test, or any Quidel product. Our hours of operation are Monday through Friday, 7:00 a.m. to 5:00 p.m. Pacific Time.
